

Daniel Robinson

Content Designer

I'm a design leader specializing in content, media, immersive experiences, and emerging technology. I've defined content strategy, taxonomy, information architecture, and product messaging for some of the world's largest platforms—leading design work over the last 15 years at Netflix, Meta, Hulu, and PlayStation, shaping the narrative behind products used by millions worldwide. My work has driven measurable outcomes, from launching a voting platform for Netflix with an 86% engagement rate, to driving a 190% lift in retention for Meta's social metaverse — I've spent my career defining the voices of my products.

Work

Content Design Lead at Netflix

SEPT 2023 – PRESENT

- Led content design for Netflix Live & Sports, shaping member experiences for WWE, NFL, MLB, and other major programming
- Shipped Netflix's first Live Interactive experience, driving an 86% engagement rate
- Launched "Moments," Netflix's first content clipping and social sharing feature, expanding new interaction patterns
- Built an AI Figma plugin to generate accessibility strings and specs, speeding content design workflows
- Established standards for Live Waiting Rooms and guided naming across key product experiences

Senior Content Designer at Meta Reality Labs

2019 – 2023

- Founded and led the Horizon Pathfinding team, defining the narrative and vision for Meta's metaverse platform
- Led Horizon Cross-Screens, helping extend the VR social experience to web and mobile and supporting a projected 10x growth in Horizon Worlds users
- Shaped the content strategy for Meta's converged metaverse UI, including information architecture, design principles, and terminology
- Created Horizon Worlds' first taxonomy system for events and world categories
- Launched a game progression and rewards system that increased visits by 6x and retention by 190%
- Represented content design in executive reviews, including presentations to Mark Zuckerberg

Product strategy

Interactive experiences, gaming and emerging tech

Customer retention

AI tools, integration & vibecoding

Media, TV streaming, & live production

Customer Advocacy and Retention Manager, Lead Design Copywriter at Sony PlayStation

2015 – 2017

- Owned product copy for PlayStation Vue across onboarding, messaging, navigation, and knowledge base content
- Built retention messaging and survey programs that reduced cancellations and churn
- Partnered with Product, Marketing, Support, and Design to identify and correct drivers of erroneous cancellations
- Led reporting on customer sentiment, churn, and retention, including a company-wide Voice of the Customer readout

Customer Experience, Manager at Hulu

2014 – 2015

- Redesigned error messaging for Hulu, improving clarity across ~100 user-facing messages
- Created a supportability review process for 70+ launches reaching ~8 million subscribers
- Built a device deprecation and replacement model to improve the experience for failing hardware
- Reduced customer contacts by 29% through journey-based process and feature improvements
- Designed the Voice of Our Viewer scorecard for company-wide UX measurement

Content Strategist at Meta Reality Labs

2017 – 2019

- Owned help content for Facebook AR/VR products, supporting major launches and 400+ articles across Oculus, Portal, and related experiences
- Established writing standards for Facebook hardware and AR/VR products, earning cross-functional adoption
- Partnered with UX Research, Design, and Engineering to improve Oculus Go unboxing and in-home use experiences
- Supported product, legal, safety, and support teams with copy for safety centers, guidelines, reporting flows, and in-product messaging

Education
